

SURAT KETERANGAN

Yang bertandatangan di bawah ini, adalah Prof.Dr.Ir. Rahim Darma, MS, Guru Besar pada Fakultas Pertanian, Universitas Hasanuddin, selaku Promotor saudara Ria Indriani lulus doktor pada tahun 2019 pada Program Studi S3 –Ilmu Pertanian, Sekolah Pascasarjana Universitas Hasanuddin.

Menerangkan bahwa yang bersangkutan memiliki kewajiban memenuhi syarat menyelesaikan studi doktor, selain dalam bentuk disertasi, juga karya ilmiah sebagai berikut:

1. Artikel yang berjudul "Supply Chain Performance of Cayenne Pepper in Gorontalo, Indonesia" dari Jurnal International Journal of Supply Chain Management Vol.8 No,5 October 2019
2. Buku yang berjudul " Rantai Pasok : "Aplikasi pada Komoditas Cabe Rawit di Provinsi Gorontalo" dengan penerbit Ideas Publishing tahun 2019
3. Artikel yang berjudul "Cayenne Pepper: Structure and Supply Chain Performance in Gorontalo Province dari Prosiding Internasional pada Konferensi "The 2nd International Conference on Global Issue for Infrastructure, environment dan socio-economic development pada tanggal 11-12 September 2019. IOP Publishing

Semua karya ilmiah diatas adalah benar merupakan bagian dari disertasi saudara Ria Indriani yang berjudul "Kinerja Rantai Pasok Cabe Rawit di Provinsi Gorontalo" Program Studi S3 Ilmu Pertanian Sekolah Pascasarjana dan sekaligus merupakan output dari dana hibah doktor tahun 2019.

Kami sebagai tim promotor, tetap mendukung untuk melanjutkan penelitiannya dan publikasi ilmiah, baik yang berkaitan dengan berbagai aspek cabe rawit, maupun yang berkaitan dengan bidang ilmu pertanian yang mendukung pengembangan kapasitas dan karier akademiknya.

Demikian surat keterangan ini diberikan kepadanya untuk digunakan sebagaimana mestinya.

Mengetahui,
Dekan,

Prof. Dr. Ir. Jamaluddin Jompa, M.Sc
NIP 196703081990031001

Makassar, 15 Desember 2020

Promotor,

Prof. Dr.Ir. Rahim Darma M.S
NIP 195904011985021001

Manuscript ID: 2631

Manuscript Title: Supply chain performance of cayenne pepper in Gorontalo

Authors: Ria Indriani, Rahim Darma, Yunus Musa, N. Tenriawaru, Mahyuddin

Dear **Ria Indriani**

I wish to acknowledge receiving of the above mentioned manuscript.

It should be noted that the manuscript will be reviewed for possible publication in the Scientific Journals Management System.

Please be sure that the submitted manuscript has not been published previously and will not be submitted elsewhere prior to our decision.

Our editorial decision will be brought to your attention once the paper has been reviewed due to the referees consideration.

I wish to take this opportunity to thank you for sharing your work with us.

Truly yours,

Executive managing Editor of IJSCM

International Journal of Supply Chain Management

International Journal of Supply Chain Management (IJSCM) is a peer-reviewed indexed journal, **ISSN: 2050-7399 (Online), 2051-3771 (Print)**, that publishes original, high quality, supply chain management empirical research that will have a significant impact on SCM theory and practice. Manuscripts accepted for publication in IJSCM must have clear implications for Supply chain managers based on one or more of a variety of rigorous research methodologies. IJSCM also publishes insightful meta-analyses of the SCM literature, conceptual/theoretical studies with clear implications for practice, comments on past articles, studies concerning the SCM field itself, and other such matters relevant to SCM.

Regular articles accepted for publication in **IJSCM** must have clear implications for practitioners who manage product and process design, operations, and supply chains based on one or more of a variety of rigorous research methodologies. Manuscripts accepted for publication must meet the following criteria:

1. Research papers in the field of SCM in manufacturing and services.
2. Research rigor applied through the scientific theory-building approach.
3. Managerial relevance.
4. All manuscripts should be submitted in English.

The journal welcomes high quality original research papers, survey paper, review paper, tutorial, technical notes as well as the discussion papers.

Focus and Scope

IJSCM's distinctive emphasis is on the management of operations and supply chains. Accordingly, the aim of IJSCM is to enhance the field of SCM and develop generalizable theory, typically through the identification, analysis, and theorization of real SCM/OM problems. IJSCM seeks research that can help the audience develop a better conceptual base for understanding SCM/OM. The focus of articles for IJSCM should be on the managerial situation or the theory being studied rather than the solution techniques being developed or used. Highest priority is thus given to studies that are anchored in the real world and build, extend or test generalizable theories or frameworks of managerial significance. Most often such studies result from identifying an actual, new managerial situation for which existing theory is inadequate, thereby resulting in an addition to theory or testing multiple theories against actual managerial situations to determine their relevance.

General topics covered by the journal, while not exclusive, include the following:

- Supply Chain processes in manufacturing and service organizations
- Upstream supply management
- Downstream demand management
- Supply Chain strategy and policy
- Technology management for supply chain
 - Supply chain planning, scheduling and control
- Human resource management for supply chains
- Supply Chain Performance measurement and productivity
- Purchasing/sourcing management
- Materials and inventory management
- Logistics, transportation, distribution, and materials handling
- International and comparative supply chain operations
- Operations and information management
- Sustainable supply chain operations
- Global supply chain
- Supply chain planning and operations

Articles

☒ Open
Submissions

☒ Indexed

☒ Peer
Reviewed

Peer Review Process

All manuscripts will be subject to a well-established, fair, unbiased peer review and refereeing procedure, and are considered on the basis of their significance, novelty and usefulness to the Journals readership. The review output will be either accept or reject. A paper once rejected will not be considered again for review. The review process may take approximately one month to be completed. For accepted paper, should authors be requested by the editor to revise the text and minor changes, the revised version should be submitted within 15 days

Open Access Policy

This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

Archiving

This journal utilizes the LOCKSS system to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration. More...

Publications Ethics

Publication Ethics and Publication Malpractice Statement

Our publication ethics and publication malpractice statement is mainly based on the Code of Conduct and Best-Practice Guidelines for Journal Editors (Committee on Publication Ethics, 2011).

I. Responsibilities of Editorial Board

1.1 Publication Decisions

The editorial board is responsible for deciding which of the papers submitted to the journal will be published. The Editor-in-Chief's decision to accept or reject a paper for publication is based on its importance, originality, clarity, and its relevance to the scope of the journal.

1.2 Fair Play

The Editorial Board and the reviewers evaluate manuscripts for their intellectual content without regard to the author's race, ethnicity, gender, sexual orientation, religious beliefs, citizenship, or political ideology.

1.3 Confidentiality

The Editorial Board must ensure that all material submitted to the journal remains confidential while under review. The editorial board and the editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

1.4 Disclosure and Conflicts of Interest

Unpublished materials disclosed in a submitted paper will not be used by the editor or the members of the editorial board for their own research purposes without the author's explicit written consent.

1.5 Journal Self Citation

An editor should never conduct any practice that obliges authors to cite his or her journal either as an implied or explicit condition of acceptance for publication. Any recommendation regarding articles to be cited in a paper should be made on the basis of direct relevance to the author's article, with the objective of improving the final published research. Editors should direct authors to relevant literature as part of the peer review process; however this should never extend to blanket instructions to cite individual journals.

1.6 Involvement and Cooperation in Investigations

An editor should take reasonably responsive measures when ethical complaints have been presented concerning a submitted manuscript or published paper, in conjunction with the publisher (or society). Such measures will generally include contacting the author of the manuscript or paper and giving due consideration of the respective complaint or claims made, but may also include further communications to the relevant institutions and research bodies, and if the complaint is upheld, the publication of a correction, retraction, expression of concern, or other note, as may be relevant. Every reported act of unethical publishing behavior must be looked into, even if it is discovered years after publication.

1.7 Publication Decisions

The Editor-in-Chief of the journal is responsible for deciding which of the submitted articles should be published. The Editor-in-Chief may be guided by the policies of the journal's Editorial Board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The Editor-in-Chief may confer with other editors or reviewers in making this decision.

II. Responsibilities of Reviewers

2.1 Contribution to Editorial Decisions

The peer-reviewing process assists the editor and the editorial board in making editorial decisions and may also serve the author in improving the paper.

2.2 Promptness

Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and withdraw from the review process.

2.3 Confidentiality

Any manuscripts received for review must be treated as confidential documents. They must not be disclosed to or discussed with others except as authorized by the editor.

2.4 Standards of Objectivity

Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

2.5 Acknowledgment of Sources

Reviewers should identify cases in which relevant published work referred to in the paper has not been cited in the reference section. They should point out whether observations or arguments derived from other publications are accompanied by the respective source. Reviewers will notify the editor of any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.

2.6 Disclosure and Conflict of Interest

Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions associated with the papers.

III. Duties of Authors

3.1 Reporting Standards

Authors of original research reports should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

3.2 Data Access and Retention

Authors could be asked to provide the raw data of their study together with the paper for editorial review and should be prepared to make the data publicly available if practicable. In any event, authors should ensure accessibility of such data to other competent professionals for at least ten years after publication (preferably via an institutional or subject-based data repository or other data center), provided that the confidentiality of the participants can be protected and legal rights concerning proprietary data do not preclude their release.

3.3 Originality, Plagiarism

Authors will submit only entirely original works, and will appropriately cite or quote the work and/or words of others. Publications that have been influential in determining the nature of the reported work should also be cited. Plagiarism takes many forms, from "passing off" another's paper as the author's own paper, to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.

3.4 Multiple, Redundant or Concurrent Publication

In general, papers describing essentially the same research should not be published in more than one journal. Submitting the same paper to more than one journal constitutes unethical publishing behavior and is unacceptable. Manuscripts which have been published as copyrighted material elsewhere cannot be submitted. In addition, manuscripts under review by the journal should not be resubmitted to copyrighted publications.

3.5 Acknowledgement of Sources

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence, or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

3.6 Authorship of the Paper

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors.

The corresponding author ensures that all contributing co-authors and no uninvolved persons are included in the author list. The corresponding author will also verify that all co-authors have approved the final version of the paper and have agreed to its submission for publication.

3.7 Disclosure and Conflicts of Interest

All authors should include a statement disclosing any financial or other substantive conflicts of interest that may be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

3.8 Fundamental Errors in Published Works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and to cooperate with the editor to retract or correct the paper in form of an erratum.

Supply Chain Performance of Cayenne Pepper in Gorontalo, Indonesia

Ria Indriani, Rahim Darma, Yunus Musa, N. Tenriawaru, Mahyuddin Mahyuddin

Abstract

The fluctuating price of cayenne pepper can be caused by the characteristics of agricultural commodities and also inefficient supply chain management arrangements. The research objective was to examine the performance of the cayenne supply chain with the approach of SCOR supply chain performance attributes based on reliability, responsiveness, agility, and assets in Gorontalo. The research method used was a survey method using purposive sampling technique. The study was conducted a year (July 2017-July 2018) in Gorontalo Province. Data were obtained from direct interviews with farmers, collectors, wholesalers, retailers. Data analysis utilized DEA (Data Envelopment Analysis). The results showed that the performance of the cayenne supply chain doer in Gorontalo was mostly efficient, only 5 farmers, 1 collecting trader, 1 large trader and 2 retailers whose performance was not efficient.
