

Peer Reviewed Journal

First of all, let us welcome you.

Explicitly, we are the peer reviewed journal of scientific research!!!

To start with JournalNX all we can say is-

JournalNX - a Multidisciplinary Peer Reviewed Journal is a peer reviewed, open access international journal. Notably, it is a referred, highly indexed, monthly, online international journal with high impact.

Subsequently, JournalNX is a platform for researchers, authors, engineers and technocrats. Also, we are publishing the original and best quality research. This is our initiative for the betterment of technical society.

The main objective, of the peer reviewed journal is to motivate the researchers. It works to achieve excellence in research publishing.

In addition, the journal provides the platform for publishing. We publish high quality scientific research work. We have the lowest processing charges. Off course, the scientific research promotion is the motivation behind having the low publication charges.

Eventually, Novateur Publication publishes JournalNX. Novateur Publication is moving towards the 5th year of excellence in scientific quality publishing.

Further, we believe that, the journal is not international by the name. It is international by the international contributing researchers, editors, reviewers. In all honesty, most important are the authors.

International Journal of Scientific Research

JournalNX being the International Journal of Scientific Research has following key features.

- Peer reviewed Journal
- Online payment
- Best paper award
- 2000+ satisfied authors
- DOI to Each Article
- Certificate of publication
- Protected by SSL encryption
- Unique Object Identifier (UOI)
- Online article submission
- Quick response to queries
- No hidden charges
- Presence in international databases

Yes, we are excellent quality International Journal of Scientific Research. Moreover, JournalNX is one of the best platforms to publish peer reviewed articles with.

Peer Reviewed Articles

Generally, speaking about peer reviewed articles, we can say that-

We are publishing the best peer reviewed articles. We cover the disciplines like engineering, management and sciences as well. Moreover, the peer reviewed articles are available with open access to all at any time.

Despite of the several articles available, our peer reviewed articles are readers favorite. Additionally, we are working on improvement is the quality further. The peer reviewed articles are index by scholar.

The JournalNX preferably, carries out the double blind peer review of each and every article. Further, we are adhering to high quality contents. Hence we request the authors to submit their original scientific research work to us.

As per the availability of the experts in the field we carry it out peer review. While, we are taking efforts to reduce the time between submission to publication. More importantly, we care for our authors and reviewers. In spite of the busy schedule, our reviewers work for us continuously.

Must Know about Peer reviewed journal:

- Online ISSN Number: **ISSN No.(E):2581-4230**
- Peer Review Process: **Double Blind Peer Review**
- Frequency of Publications: **Monthly (12 issues per Year)**
- Access to the published Peer reviewed articles: **Open Access**
- Scope of Publication: **Multidisciplinary (such as Engineering, Sciences Technology and Management)**
- International License: **CC BY**
- Plagiarism Checking: **Plagiarism checker-X or Turnitin**
- Acceptance Status : **1-2 weeks**
- Publication Period : **1-2 weeks**

To conclude we can say, in consequence with the above stated facts, our policies on publishing are prepared. In short, being International Journal of Scientific Research, we are strict on the policies of publication. Moreover, we stick to policies. At last, we request the authors to join us.

About JournalNX

This section explains you about JournalNX. We are one of the tops-

Open Access Journals

Open access journals are very effective in recent days. Publishing the contents in open access journals will help the author for better circulation of research.

As the policy JournalNX has accepted to be open access for all the scholarly research published in its volumes. We are focusing to be one of the best open access journals of coming time.

The open access approach makes the researcher and scientific authors to read, evaluate and refer the contents of JournalNX without any obstruction for better scientific publishing society.

Best Online Journals

Best online journals are being trendy in the world of digitization. It assures the digital preservation of the scholarly published articles. Being one of the best online journals we are expanding our presence in reputed indexing services (<https://journalnx.com/blog/top-indexing-services/>)

The authors of JournalNX are at least anxious about the preservation of the article. Another advantage of the best online journals is 24*7 access across the globe without any login id and password.

Paper Publication Niche

Paper publication with us is very easy. JournalNX being the research publication is providing the paper publication opportunity in multidisciplinary areas (<https://journalnx.com/journal-scope>)

It has certain accountability to offer the equal opportunity to the scientific publishing society all over the world.

JournalNX with its high ethics and aim has taken the responsibility to reach to the niche of the best research publishing experience for the authors.

Scholarly Journal for Scientific Publication

The words Scholarly Journal for Scientific Publication define JournalNX the best. JournalNX being the online research journal in the territory of Engineering, Sciences, Technology, & Management is found suitable for high-quality paper publications in the field.

The online presence of the research journal fulfills the need of scholarly publishing with open access. We are trying to elaborate ourselves on the following details:

Our Vision

"To offer the best online scientific publishing platform for

Our Mission is to achieve

- Excellence in online scholarly publishing
- Continuous improvements in scientific publication
- World's leading place in research journal publication

About Journal Publisher

JournalNX is the establishment of Novateur Publications, India. The journal Publisher is functioning with excellent infrastructural facilities for JournalNX. Novateur publication is moving towards the 7th floor of excellence as the journal publisher.

Journal Impact Factor list:

Journal impact factor list is published yearly by the repository. It is a list of calculated values of journal impact factor. The journal impact factor is calculated on the basis of various factors like quality of contents and citations.

Journal impact factor list is generally representing the quality of the journal. The impact factor is not only the symbol for the quality but also the prestige of our journal.

We being the research journal will be continuously working to improve authors experience with us. The journal impact factor value is the reward of success for the quality articles of our authors.

Welcome to our site, if you need help simply reply to this message, we are online and ready to help.

The impact factor represents the high impact of JournalNX. It is the great achievement for all of us. We all together will work for the improvement of journalNX in future too. We are applying to various evaluating agencies for impact factor.

The aim of this evaluation is cross-checking our quality from more than one external agencies. The results for the same will be updated soon. The ideology of the impact factor may be difficult to digest for few of us.

But we strongly believe "our quality will only improve when we get evaluated from others". We welcome all the suggestions from the various evaluating agencies.

To improve upon the citations we are expanding our presence by means of indexing (<https://journalnx.com/index-journal>) of our articles in various reputed databases (<https://journalnx.com/blog/top-indexing-services/>)

What is Indexing?

The indexing of the journal stands for making the published articles available on different standard international online platforms in order to improve the citations to the articles. The journal articles available on the different repositories will help the researchers to refer for their further work. JournalNX believes in making the articles available at the best platforms as we believe in the philosophy of open access to the published research articles. Refer (<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3354504/>)

There are several paid and unpaid services available globally for journal Indexing, most of the services are preserving the documents and making it available whenever required for future references. The reputed repositories of the journal articles are sharing the data with universities, public libraries and other scientific sources. While the open access repositories are making the data available free of cost and the access is open to all. As the published article is indexes in various standard platforms, the article will be referred by the author and cited for their work. More the citations for the articles more will be the authenticity of the published article. The high quality articles will be referred by the researchers to improve their work and citation can be treated as a symbol of popular and original research article.

JournalNX believes in improving the citations of the articles by indexing the articles in various standard and authentic platforms of journal indexing. The more citations of the articles will be together counted as the citations of the journal and the journal with highest citations will be the best journal from the point of view of the Impact Factor. We can judge the quality of the journal and its articles with the citations achieved by the journal.

JournalNX is indexed in above international databases. Please click on the logos to verify the indexing of JournalNX and to know about the number of articles indexed in the database. Our team is working on continuous submission of the articles in the said databases; authors are requested to keep patience for minimum one month from the date of publication to check the status of the articles indexed.

ABSTRACT:

Transglobal Leadership in the Digital Age according to Policy; President Joko Widodo (Jokowi) emphasized that people must be able to compromise, live side by side, and make peace with Covid-19, in order to remain productive, for that, the government regulates that people's lives can continue to run normally, with the term New Normal. Leadership influences; in All Aspects of Life; both economics / finance, especially in the field of Transglobal Leadership in the Digital Age. Writing articles aims to; achieve Goal Oriented Output & Outcomes (new normal conditions in the digital era and coordination of transglobal leadership policies during the new normal in the Digital Age). The output of this article is for institutional optimization of the professionalization of the implementation of transglobal leadership policies and the implementation of health procedures through institutionalized education programs through transglobal leadership policies in the digital era.

KEYWORDS: New Normal. Transglobal Leadership Policy. Digital era

INTRODUCTION:

New normal conditions, including in government policy. The government regulates people's lives, to live accordingly. Humans must be able to adapt to life situations and conditions that continue to pay attention to health

procedures, to routine daily activities, usually carrying out work, school, sports and others. Even though the pandemic has ended, each individual can carry out work according to the routine he did as before, by staying alert and maintaining the surrounding conditions either in a new normal life or a new routine with activities that have been carried out for a long time, without burdening our psychology with thoughts and limiting space and work as a leader in carrying out his leadership. The leader with his leadership continues to move globally and must continue to be able to pay attention to the progress of information and communication through digital which continues to grow.

Transglobal leadership in the digital era in addition to carrying out its duties in institutions also pays attention to health procedures and digital progress. This is a big challenge because the adaptation process is certainly not as easy as turning your palm. This adaptation process will be successful if leaders with global leadership can transform, pay attention to situations and conditions properly and can improve leadership competence in the digital era.

Leadership with globalizing policies must be able to keep up with rapid technological developments, encourage the ability of the digitalization era in all aspects of life, including in the world of work and individual leadership. The flexibility offered and the presence of technology have proven to contribute a lot to the ease of each individual's activities,

especially a leader to work in helping his leadership activities, especially transglobal leadership in the digital era for educational institutions. Also especially for students as millennial generation; enjoy and be more open to taking advantage of technological developments in the digital era in their daily activities in implementing the learning process.

Referring to Eric Mary's opinion. Country Manager of Robert Walters Indonesia; on Performance institutions; a professional recruitment specialist company on a global scale, how the digital era has changed the way a leader manages his organization, including managing and integrating the millennial generation. This is in accordance with the opinion of Baby Boomers and Generation X to avoid conflicts between generations at work and to maximize work, so the era of digitalization plays a very important role in information and transformational progress.

Based on the explanation above, this article is focused on the New Normal Conditions and the Influence of Transglobal Leadership Policies in the Digital Age.

THEORITICAL REVIEW:

Referring to Cleveland's opinion, there are four things we must do in order for the adaptation process to a new routine or a new normal. Here are 4 things that can be done in order to be able to adapt to the new normal situation and conditions, namely; 1). Make Peace with the Situation 2) Maintain Communication with Other People 3) Maintain Emotional Balance 4) Focus on the present 5).

The situation in the midst of an urgent transition, leadership in all sectors and levels, especially leadership in educational institutions, has an important factor in determining success. Every leader applies Transglobal leadership. Transglobal leadership is synonymous with modernist leadership; that

is, leadership with all systems and values, as a consequence a much more adaptive type of leadership is needed. Especially in the midst of the Covid 19 pandemic situation which has changed the previous order, it is very appropriate for transglobal leadership to be an important application to improve all aspects of improvement in new normal conditions, namely through the digital era, improved through the industrial revolution 4.0 system in the advancement of communication technology that is reflected on the application of artificial intelligence (Artical Intelligence), Internet of Things (IoT) and Big Data, this requires the speed of thinking and acting, through Transglobal leadership is the most type. (Syahrul & Inas; 2020)

The presence of Transglobal leadership can be the most rational option. In the midst of ambiguous conditions and technology-stuttering attitudes that lead to work disorientation in various institutions and institutions, a leader who has intelligence is needed.

According to Eric's opinion, there are several new criteria that leaders in this digital era must have, to measure the success of leading different generations in their workplace, namely; 1) Ability to master information technology communication. 2) Open Minded. 3) responsive to change 4) Dare to Take Risks 5) Optimizing Your Own Energy 6) Obtaining and Providing Energy to other leaders 7) Providing Energy to the whole Organization. 8) Managing Intergenerational Conflict in the Workplace

RESEARCH METHODS:

The method of writing this article; through the search of literature study / library research (Library Research) and observation of problems that are narrated, based on a descriptive approach, and analyze through primary data; Experience the reality of existing

education and literature review as well as research journals and internet articles. Library Research Library technique is "library research carried out by reading, studying and recording various literatures or reading materials that are in accordance with the subject matter, then filtered and put in a theoretical framework of thought". (Hardiansyah, Haris. 2012)

RESULTS AND DISCUSSION:

New Normal Conditions In the Digital Age:

An unprecedented situation has become a new normal in the midst of the Covid-19 pandemic, in carrying out activities, you should still wear a mask when you always wash your hands, and maintain physical distance when you are in a crowded place / workplace. New normal conditions, each individual continues to carry out activities and provide services while still paying attention to Covid's health procedures

World of Education, in new normal condition; keep on moving through; 1) Implementation of the Home Teaching and Learning System 2) Carrying out Online Examinations 3) Graduation in Digital Format (in Design and already implemented).

The implementation of the new normal is regulated in the Decree of the Minister of Health Number HK.01.07 / MENKES / 328/2020 concerning Guidelines for the Prevention and Control of Covid-19 in Office and Industrial Workplaces in Support of Business Continuity in Pandemic Situations. Below is an image to comply with Potap health regulations in the work place of Public areas, also in educational institutions.

Leadership in Leadership:

Leaders in leadership have different meanings; a) A leader is a person who leads a group of two or more people, either organization or family. Whereas leadership is the ability of a leader to control, lead, influence

the thoughts, feelings or behavior of others to achieve predetermined goals. Meanwhile, b) leadership is an inherent ability in a person who leads which depends on various factors, both internal and external factors. If the leader is translated into English, it becomes "LEADER", which has duties for LEAD members around him. Meanwhile, the meaning of LEAD is: 1). Loyalty, a leader must be able to arouse the loyalty of his colleagues and give loyalty in kindness. 2). Educate, a leader is able to educate his colleagues and pass on to his colleagues. 3). Advice, provide advice and advice on existing problems. 4). Discipline, provides an example in discipline and enforces discipline in every activity. (Kartono Kartini; 2008)

Leadership can be said as the way of a leader in serving, directing, encouraging and managing all elements in groups, organizations, institutions to achieve the desired institutional / company goals so as to produce the performance of subordinates / employees in achieving the work of an individual or employee in realizing the objectives of the institution / company. As described in the image below; to become a leadership can be; 1) Empower people. 2) Inspire People 3) Lead Change. 4) Shared Vision.

Being a good leader, a leader must have; 1) vision 2) focus 3) Integrity 4) Inspiration 5) Recognition 6) communication 7) Enouragement 8) goals 9) support 10) Simulating work 11) good Example.

Transglobal Leadership Policies in a New Normal Era in the Digital Age:

The influence of Transglobal Leadership can be implemented through Transglobal Leadership Policies in the New Normal Era in the Digital Age.

As for the influence of Transglobal leadership, leading to leadership based on; keep the spiritual soul, can balance emotional intelligence for the stability of intellectual intelligence. Emotional intelligence can adjust the cultural development and entrepreneurial spirit of individuals, while intellectual intelligence can determine and according to Dewi, I Gusti Ayu Manuati. (2009), that measuring the effectiveness and productivity efficiency of a leader with transglobal leadership is very important.

Based on the explanation above, it can be seen in the picture; Transglobal Leadership concept design.

Transglobal Leadership; Leaders should have full creativity; has talent / habid and has a breakthrough move Out Of The Box; have an adaptive soul; resilience, have a spirit of flexibility, have a spirit of connectivity and responsiveness in all situations and circumstances, and can compete in global competition to achieve productive leadership.

Below is a design drawing of the Transglobal leadership concept below;

Transglobal leadership in the New Normal era is very important to pay attention to; 1) The importance of actualizing and internalizing the values of transglobal leadership in supporting the success of an institution / organization is a very urgent priority. 2) Strategic Policy and HR Development System according to their Expertise Areas. 3) Commitment of leaders and all parties to carry the importance of efforts to develop superior & competitive human resources 4) Concern for Transglobal Leadership to create good work governance; achieve increased work productivity and welfare of its members through the use of programs that are applicable, transparent and accountable.

Leadership has a nature; 1) High influence 2) Have followers 3) Intention (vision) 4) Common Member Goals 5) Personal Responsibility 6) Have positive changes.

Leadership in the Digital Age; the leader must be able to become; 1). Knowing; a) A leader is born from an authentic process that begins with knowledge. As a leader, he needs to think and understand the skills, competencies and technical information needed to be able to manage a team in the modern world of work. For many leaders, digital can be a 'frenemy' (friend / foe). (Agus Mulyanto. 2009) This can be a forum to increase the influence, prestige and strength of a leader. b) Technology can be a hidden opportunity, where "digital" can be a medium that plunges leaders into "ego centric". c) A leader may be increasingly famous because of social media, so he is reluctant to interact with people who are considered "not on his level". d) However, it must be realized that the success of a leader, one of which is the media; which records the success trail of a leader who is known to many people through digital media

information, as modern information technology. e) Knowledge and ability to use digital technology are needed by a leader, not only in this digital era as a leader but must be flexible in order to keep up with the dynamic developments. 2) .Doing; a) Leaders who have the right information; able to take advantage of authentic digital quite easily. b) The challenge when becoming a leader by leading others; Leaders in putting that knowledge into practice create output and outcomes in the institution. c) The digital world of information can be accessed quickly and easily, so this convenience encourages leaders and members to further increase innovation. Not only that, the character 'culture, the spirit of entrepreneurship / entrepreneurship that is built makes leaders more willing to take risks. d) The leader does not only provide delegation and orders, but it is necessary for a leader to be involved in existing activities. e) Working with a team, interacting and taking an active role with many members of the institution is one way to become a leader who is not only stuck in "status", but also takes "action" in accordance with the required capacity. 3). Being; The most difficult thing about becoming a true leader is the form stage. a) The commitment of the leader is challenged to be able to consistently manifest the role of a leader in the institution. b) Leaders must be able to guide their members to achieve goals, act according to values, in maintaining integrity. c) The leader has the best track record that can be exemplary and become self-integrity. d) Leaders can overcome all obstacles in life and learn from various experiences to achieve success. Experience can shape today's leaders, as well as influence how to make decisions and be smart in technology. e) Leaders must be able to influence their members, they must also be able to encourage their members to use science and be smart in using Digital ". f) Leaders are able to act and make smart decisions. g) The

leader must be able to manage every component of how other people react, respond, and improve work results and be a solution (responsive and resilient) for members and changes occur quickly. h) It is important for leaders to be able to embrace and accept at the same time, both the pros and cons of every activity in the organization and also anticipating rapid changes in the digital era. i) Leaders in this digital era will communicate and engage with many audiences more often. j) Leaders, must be able to build a global perspective and minimize subjective perspectives. k) Even the leader must be able to have a unique and new perspective. l) Leaders in the digital age must try and must be able to take these three things more seriously, so that they can become leaders who have policies in transglobal and must be able to lead the team to success with institutions / companies.

Transglobal Leadership Policy; Based on the opinion of; 1) Bambang; (2019): explains that transglobal leadership is leadership based on intelligence, and is directly proportional to productivity. 2) transglobal leadership system; such as from the center to the regions and universities through empowerment / services; Human resources, education managers, are able to increase productivity, output and outcomes. 3) Transglobal leadership must change; Adjusting to the dynamics and demands of the times. 4) Leaders are very important to improvise & be able to understand the development and changes of leadership in all lines from time to time. 5) During the New Normal Era, every leader must dare to change. It has even become a pioneer of change as a whole and integrated across sectors with other stakeholders. (Kristiansen, Stein. Praktikno. 2006.)

Digital Diera leadership can be seen in the following Figure design;

Based on the explanation above, a leadership must be in accordance with the picture below;

- 1) vision 2) Strategy 3) Decision. 4) Challenges
- 5) Teamwork 6) Creativity 7) Motivation 8) Ambition (Beach, L.R & Connolly, T. (2005)

CONCLUSION:

Transglobal leadership in the new normal era can carry out the policies of a reliable leader with professional leadership in mastering information technology in the digital era, to achieve Goal Oriented Output & Outcomes (in new normal conditions in the digital era and can coordinate transglobal leadership policies during the new normal in the era Digital). Optimizing Transglobal Leadership must be institutionalized for the professionalization of the implementation of leadership policies in implementing health procedures through institutionalized education programs through transglobal leadership policies in the digital era.
