

Certificate of Appreciation

is awarded to
Dr. Maryam Rahim, M.Pd

For Presenting the Paper:

The Role of Guidance and Counseling in Millenial Generation Character Building

at the Indonesian FIP-JIP Forum and 5th International Conference on Education and Technology (5th ICET) with the main theme “Reorientation of Education in the Era of Industrial Revolution 4.0 in Nation Development”.

organized by Faculty of Education, Universitas Negeri Malang at The Singhasari Resort and Convention, Batu City, East Java, Indonesia on 2nd – 5th October 2019

Prof. Dr. AH. Rofi'uddin, M.Pd
Rector, Universitas Negeri Malang

Prof. Dr. Bambang Budi Wiyono, M.Pd
Dean, Faculty of Education

Date: 31/08/2019

Dear *Wenny Hulukati*

We are pleased to inform you that your paper entitled:

The Role of Guidance and Counseling in Millennial Generation Character Building

has been **accepted** for oral presentation in 5th International Conference on Education and Technology after peer review by the editorial board (5th ICET 2019). Please note that the conference will be held on 3-5 October 2019 at The Singhasari Resort Jl. Ir. Soekarno No.120 Beji, Batu, East Java Indonesia.

This paper is under review to be able to be published in a SCOPUS Indexed journals SCOPUS Indexed Proceeding, or Thomson Reuters Indexed Proceeding, as follows:

1. International Journal of Innovation Creativity and Change (IJICC), SCOPUS Indexed Journal.
2. International Journal of Information and Education Technology (IJET), SCOPUS Indexed Journal.*
3. International Journal of Knowledge and Learning (IJKL), SCOPUS Indexed Journal.
4. IEEE Proceeding, SCOPUS Indexed Proceeding
5. Atlantis Press Proceeding, Thomson Reuters (Clarivate Analytc) Proceeding Indexed

Please pay the publication fee Rp. 1.500.000 for all publishers above + Rp. 3.000.000 (Registration fee) within 7 days.

*Especially for paper published on IJET must pay US\$ 350 (publication fee), the payment will be charged after acceptance letter sent by the journal editor.

Kindly upload/send payment proof to our conference mail address: fipjip.fip@um.ac.id within 7 days.

If you have any queries, feel free to contact the secretariat.

Best Regards,

Adi Atmoko
Chairman of FIP-JIP 2019

Education, as the foundation of a nation, needs to be improved on an on-going basis. Various steps have been taken to achieve a better quality of education that can align with developed countries around the world. Improving the process of education, research development, expansion of community service, the improvement of scientific activities, including scientific conferences, are the efforts to improve the quality of education.

This 5th International Conference on Education and Technology (ICET 2019) is one step in disseminating knowledge that is set at a scientific meeting in the field of education. The conference provides a channel for educational researchers and practitioners to share knowledge in order to improve the quality of education. In 2019, this conference is part of the main activity program of FIP JIP (Forum of Faculty of Education and Department

of Education) 2019 that organized by Faculty of Education Universitas Negeri Malang (UM) in collaboration with faculty of education from 12 state universities producing educational staff in Indonesia. Faculty of Education UM feels honored to be a host of this prestigious conference.

The theme of the conference is “Reorientation of Education in the Era of Industrial Revolution 4.0 in Nation Development”, with featured keynote speakers from various countries including USA, Finland, Taiwan, Malaysia, and Indonesia. The purpose of this conference is to share our ideas and strategies to improve education system in era of industrial revolution 4.0. The conference also facilitates the lecturers, principals, supervisors, teachers, students, or all who have attention to education to express and share their ideas through writing and presenting articles of the conference about how to improve the quality of education in the era of technology development.

On behalf of the faculty of Education UM, we thank you for the cooperation that has been given at this conference. In addition, we appreciate all the audience and participants, specially the deans, vice deans, head of departments, secretary of departments, head of study programs, the keynote speakers, the chairman of the event, the committee and the crews, the reviewers, and all the rest that I cannot mention one by one who highly participated in the conference.

Hopefully, this conference is useful for all, especially to solve the problems and develop the education system in line with the development of technology in industry revolution of 4.0. In addition, we hope this conference can contribute to improving the quality of education in particular and global.

May Allah SWT bless all our efforts to support this conference successfully.

On behalf of the Organizing Committee
Dean of Faculty of Education
State University of Malang
Prof. Dr. Bambang Budi Wiyono, M.Pd

Indexing

All articles in these proceedings are submitted for indexation in **CPCI, CNKI**

and **Google Scholar**. Optionally, we also submit to **Compendex** and **Scopus**. Note that in case you need information about the indexation of these proceedings, please check with the organizers of the conference as we cannot reply to messages received from participants.

Free Access

In order to increase the visibility of this conference and of the papers from its participants, this conference has chosen to sponsor the online publication of the conference papers. Therefore, all conference papers can be read and downloaded **for free**; no subscription or other payment is required.

Copyright

The copyright of all articles published in these proceedings remains with the **Authors**, i.e. Authors retain full ownership of their article. Permitted third-party reuse of the open access articles is defined by the applicable **Creative Commons (CC)** end-user license which is accepted by the Authors upon submission of their paper. All articles in these proceedings are published under the **CC BY-NC 4.0** license, meaning that end users can freely **share** an article (i.e. copy and redistribute the material in any medium or format) and **adapt** it (i.e. remix, transform and build upon the material) on the condition that proper **attribution** is given (i.e. appropriate credit, a link to the applicable license and an indication if any changes were made; all in such a way that does not suggest that the licensor endorses the user or the use) and the material is only used for **non-commercial** purposes. For more information, please refer to the **Open Access and User Licenses** section in the Atlantis Press **Open Access & Article Sharing** policy.

DOIs

Each article that is published in these proceedings is assigned a **Digital Object Identifier** (DOI). DOIs are standardized digital identities which can be used to cite and link to electronic content. A DOI is guaranteed to never change, so can be used as a persistent identifier to permanently link to an electronic article no matter where it is stored. More information on how to cite and use DOIs can be found [here](#).

Permanent Archiving

Atlantis Press is committed to the **permanent availability** and **preservation** of scholarly research and to ensure **accessibility** to this research by converting and upgrading digital file formats to comply with new technology standards. Besides maintaining its own digital archive, Atlantis Press therefore collaborates with the **National Library of the Netherlands** which permanently archives all Atlantis Press content in their “**e-Depot**”. All proceedings are uploaded to this e-Depot after publication to guarantee permanent archiving of the articles.

Print Copies

In case you wish to have **printed copies** of these proceedings you can order these directly from our partner **Curran Associates**.

Indexing Databases

INDUSTRY AFFILIATIONS

PROFESSIONAL ORGANIZATIONS

INDEXING DATABASES

LEARNED SOCIETIES

(RESEARCH) INSTITUTIONS

Atlantis Press has affiliations with the following indexing databases:

Web of Science
Trust the difference

Web of Science

Clarivate Analytics' *Web of Science* is an online subscription-based citation indexing service which gives access to multiple databases that reference cross-disciplinary research and which allows for comprehensive citation search and in-depth exploration of specialized sub-fields within a scientific discipline. It consists of 6 core databases, a number of specialist collections, as well as regional databases and currently contains more than 160 million records and over 1.7 billion cited references. A select number of Atlantis Press journals and proceedings is indexed in Web of Science databases such as the *Science Citation Index Expanded (SCIE)*, the *Emerging Sources*

Scopus® Scopus

Elsevier's *Scopus* is the world's largest abstract and citation database of peer-reviewed scientific journals, books and conference proceedings which covers research topics across all scientific, technical and medical disciplines. The database currently contains more than 75 million records and over 1.4 billion cited references, while it also offers various smart tools and metrics to track, analyze and visualize research. At present a select number of Atlantis Press journals and proceedings is indexed in Scopus and a number of applications are in progress.

MEDLINE® MEDLINE

MEDLINE is the *U.S. National Library of Medicine* premier bibliographic database that contains more than 25 million references to journal articles in life sciences with a concentration on biomedicine. The subject scope of MEDLINE is biomedicine and health, broadly defined to encompass those areas of the life sciences, behavioral sciences, chemical sciences and bioengineering needed by health professionals and others engaged in basic research and clinical care, public health, health policy development or related educational activities. MEDLINE also covers life sciences vital to biomedical practitioners, researchers and educators, including aspects of biology, environmental science, marine biology, plant and animal science as well as biophysics and chemistry. A select number of Atlantis Press journals in health and medical sciences is indexed in MEDLINE.

PubMed Central (PMC)

PubMed Central (PMC) is a free full-text digital archive of biomedical and life sciences journal literature which has been developed and operated by the **National Center for Biotechnology Information** (NCBI), a division of the **U.S. National Library of Medicine** (NLM) at the **U.S. National Institutes of Health** (NIH). As of today, PMC contains more than 5.9 million full-text articles spanning several centuries of biomedical and life science research (late 1700s to present). Participation by publishers in PMC is voluntary, although participating journals must meet certain scientific and technical standards and content must be deposited as per the NIH Public Access Policy. A select number of Atlantis Press journals in health and medical sciences is indexed in PMC.

Directory of Open Access Journals (DOAJ)

The *Directory of Open Access Journals* (DOAJ) is a community-curated online directory of open access journals which aims to be the starting point of all information searches for quality, peer-reviewed, open access material. DOAJ's mission is to increase the visibility, accessibility, reputation, usage and impact of quality, peer-reviewed, open access scholarly research journals globally, regardless of discipline, geography or language. At present, the directory contains more than 14,000 open access journals from 133 countries and more than 4.6 million open access articles covering all areas of science, technology, medicine, social science and humanities. All Atlantis Press journals are indexed in DOAJ.

Ei Compendex

Elsevier's *Ei Compendex* (Engineering Index - COMPUterized ENgineering inDEX) on **Engineering Village** is the broadest and most complete engineering literature database in the world. It provides a holistic and global view of peer-reviewed and indexed publications with over 20 million records from 77 countries across 190 engineering disciplines. A select number of Atlantis Press journals (i.e. within relevant subject areas) is indexed in Ei Compendex.

PubMed

PubMed is a free search engine which provides access to references and abstracts from biomedical and life sciences literature and which has been developed and maintained by the **National Center for Biotechnology Information** (NCBI), a division of the **U.S. National Library of Medicine** (NLM) at the **U.S. National Institutes of Health** (NIH). PubMed comprises more than 30 million citations and abstracts, primarily from **MEDLINE** but also from **PubMed Central** (PMC) and other life science journals and books, covering the fields of biomedicine and health and portions of the life sciences, behavioral sciences, chemical sciences and bioengineering. Many PubMed records also contain links to full-text articles, some of which are freely available (often in PMC). A select number of Atlantis Press journals in health and medical sciences is indexed in PubMed.

Portico

Portico is a community-supported digital preservation archive that safeguards permanent access to e-journals, e-books and digital collections for researchers, scholars and students. The Portico digital preservation service is part of **ITHAKA**, a not-for-profit organization which aims to "help the academic community use digital technologies to preserve the scholarly record and to advance research and teaching in sustainable ways". The Portico archive currently contains more than 88 million journal articles, more than 1 million books and more than 4 million other digital collection items from a total number of 663 participating publishers. To comply with NLM requirements (for indexation in **MEDLINE** and **PMC**) a select number of Atlantis Press journals is preserved in the Portico archive.

China National Knowledge Infrastructure (CNKI)

The *China National Knowledge Infrastructure* (CNKI) is a key national information construction project launched by **Tsinghua University** and supported by the PRC Ministry of Education, PRC Ministry of Science and Technology, PRC Ministry of Propaganda and the PRC General Administration of Press and Publication. It is dedicated to the mass digitization of China knowledge resources as well as creating the platform for global dissemination and value-added services (CNKI was designated as the second agent of DOIs in mainland China by the **International DOI Foundation** in 2013). It comprises the China Integrated Knowledge Resources Database which contains over 90% of China knowledge resources. Most of the Atlantis Press proceedings and journals content is indexed in CNKI.

Wanfang Data is an affiliate of the Chinese Ministry of Science & Technology which provides access to a wide range of database resources serving as a gateway to Chinese culture, medicine, business, science, engineering, etc. The Wanfang Data electronic resources comprise more than 43 million journal articles, close to 5 million dissertations and theses, more than 4 million conference papers and a broad collection of Chinese statistical data, patents, etc. Most of the Atlantis Press proceedings and journals content is indexed in Wanfang.

dblp computer science bibliography

The *dblp computer science bibliography* is an online reference for biblio-graphic information on major computer science publications. Starting at the University of Trier in 1993 and owned by the Leibniz-Zentrum für Informatik since 2018, it evolved from a small experimental web server into a popular open-data service for the computer science community. The dblp mission is to support computer science researchers by providing free access to high-quality bibliographic metadata and links to electronic editions of publications. The dblp currently indexes more than 5.1 million publications, published by over 2.5 million authors. All Atlantis Press journals in fields related to computer science are indexed in the dblp.

Ulrichsweb

ProQuest's *Ulrichsweb* is the standard online library directory and database for journals, magazines, newspapers and other periodicals. As such, it is regarded as the global authority for serials knowledge and analysis which

comprises more than 383,000 serials from over 90,000 publishers covering 977 subject areas and 200 different languages. Records include searchable TOCs, ISSN, title, publisher, online availability, subject area, language, list prices and more. All Atlantis Press serial publications are indexed in Ulrichsweb.

Google Scholar

Google Scholar is a freely accessible web search engine that indexes the full text or metadata of scholarly literature across an array of publishing formats and disciplines. The Google Scholar index includes most peer-reviewed online academic journals and books, conference papers, theses and dissertations, preprints, abstracts, technical reports, and other scholarly literature, including court opinions and patents. It is estimated to contain more than 160 million documents and continues to cover approximately 90% of all articles published in English. All content published on the Atlantis Press platform is indexed in Google Scholar.

Atlantis Press

Atlantis Press – now part of Springer Nature – is a professional publisher of scientific, technical & medical (STM) proceedings, journals and books. Abstract: Character building for millennial generation is increasingly essential; particularly, in order to maintain the existence of the Indonesian generation as a generation that still based on the character Indonesian values as crystallized in Pancasila (the Indonesian philosophy). Guidance and counseling services have an important role in character building for millennials. Therefore, this study is aimed at examining the role of guidance and counseling in character building for millennials. Millennial generation has different characteristics from the characteristics of the previous generation. Taking into account the characteristics of millennial generation, guidance and counseling services have the role of preventing millennial generation from the influence of gadgets and social media, developing work ethics, preventing consumptive and hedonic lifestyles, developing entrepreneurial and independent souls, and developing creativity. The position of guidance and counseling/counselor teacher must be a person who: understands the character of millennial generation, is creative, masters the development of information technology, has an entrepreneurial spirit, and becomes a model/example in character behavior.

Keywords: the role of guidance and counseling, character building, millennial generation

I. INTRODUCTION

Character building for millennials is increasingly needed, especially in order to maintain the existence of the Indonesian generation as a generation that is still based on the character values of the Indonesian nation as crystallized in Pancasila as the philosophy of Indonesian life. Character building for Indonesia's millennial generation is a challenge faced by the world of education in Indonesia, bearing in mind that education plays an important role in character building.

The education system in schools includes three main components, namely the administration and supervision component, the learning component of the field of study, as well as the Dikti guidance and counseling component, 2007). These three components synergize according to their respective functions to achieve educational goals, which include three domains/aspects which jointly constitute a roundness of cognitive, affective, and psychomotor components. To achieve these goals is not enough through the field of teaching, although it is realized that the teaching field (instruction) is the main field in the overall education in schools. As stated by Winkel and Hastuti (2004): "that the teaching and administration fields are not yet capable enough to provide services to students, so other fields are needed specifically to pay attention to the development of each student, that field is guidance and counseling." As an integral part of the education system in schools, guidance and counseling have an important role in character building for millennial generation.

II. LITERATURE REVIEW

1. Millennial Generation

According to Lee & Kotler (Madrigal, et al.; 2017), millennial generation is a generation born around 1980 to 2000, in the sense that they are the current young generation who are now around 17-37 years old.

Millennial generation has a distinctive characteristic that is formed by the influence of the development of science and technology that occurred at the time of this generation's life. Tapscott (in Lalo, 2018: 72) stated that millennial generation often has a characteristic of freedom, likes to personalize, relies on instant information speed, likes to learn and work with an innovative environment, actively collaborates and hyper technology. Deal, Altman, & Rogelberg; Hershatter & Epstein; Kowske, Rasch, & Wiley (Pyoria, Pasi. et al.; 2017) said that this generation has a high ability to use information and communication technology. In terms of age, this generation will play a very important role in the next 10 years. According to BPS data, there are currently 50% of the population of productive age and come from millennial generation and will reach 70% of the population of productive age from 2020 to 2030 (Lalo, 2018: 72).

J. Kilber, A. Barclay & D. Ohmer (in Sutijono & Farid), identified the characteristics of millennial generation namely internet addiction; high self-esteem and self-esteem; more open and tolerant of change; show salary and recognition for individuals; flexible work schedule; and career advancement as an important factor for millennial generation. Likewise Elizabeth T. Santoso (in Bhakti and Safitri) explained the millennial generation indicators, namely: having a strong ambition to succeed, tend to be practical and behave instantly, love freedom and have high self-confidence, tend to like things that are detailed, have a great desire to get recognition, and be proficient in using technology and information.

Looking at the characteristics of millennial generation, a picture of the importance of character building for this generation can be obtained. High ability to use information technology will have both positive and negative impacts on millennial generation. The positive impact of the use of information technology will develop

creativity and broaden horizons related to the rapid development of science and technology, while the negative impact is in the form of the influence of various information and culture that forms deviant behavior in terms of ethics, morals, and religion in millennial generation.

2. Definition of Character

There are various definitions about character, which basically says that character is a condition that describes a person from his behavior. A person's character will be reflected in the behavior that he displays in daily life, both as an individual being, as a social being, and as a religious being. Character is the core of personality as well as the core of behavior. According to Sunarta (in Syarbini, 2012; 14), character is a special characteristic of the basic structure of one's personality. As stated by Ghufon (2012), a character is the identity, personality, and character inherent in a person. Character is always related to the physical and psychological dimensions of individuals. Furthermore, Raka, et al. (2011,37) said that the character radiates from the inside out (inside-out). That is, good habits are done not at the request or pressure of others but on their own awareness and will. Character is "what you do when no one sees or cares about you." This understanding implies that the character is the original behavior of a person, and is not made up.

The definition of character according to the National Education Center is "innate, heart, soul, personality, character, behavior, personality, character, character, temperament, character." Hill, as quoted by Chrisiana (2005), said that "character determines someone's private, thoughts and someone's action done. Good character is the inward motivation to do what is right, according to the highest standard of behavior in every situation. Ekawarni (2010) argued that character is the basic value of behavior that is a reference to the value system of interaction between humans (when a character is lost the everything is lost). Character is universally formulated as a value of living together based on pillars: peace, respect, cooperation, freedom, happiness, honesty, humility, tolerance, and unity.

If an understanding of character is examined, it can be said that character is closely related to value, which is something that is highly valued and upheld by every individual in his life, called life values. Therefore the value (value) of each individual will be manifested in character. Talking about individual characters is nothing but talking about value. Thus the opinion is correct, which says that character building is nothing but value education.

3. Character Building

Character development requires efforts in the form of education so that the term character building emerges. In the Guidelines for Implementation of Character building (Ministry of National Education, 2011), it is said that character building is not merely teaching what is right and what is wrong. More than that, character education is an attempt to instill good habits (habituation) so that students are able to behave and act on the values that have become their personalities. In

other words, good character education must involve good knowledge (moral knowing), good feeling or good moral (moral feeling), and good behavior (moral action) to form the embodiment of behavior and life attitudes of students. David Elkind and Freddy Sweet (in Noor, 2012; 56) said: Character building is the deliberate effort to help people understand, care about, and acts upon core ethical values. When we think of the kind of character we want for our children, it is clear that we want them to be able to judge what is right, care deeply about what is right, and then do what they believe to be right, even in the face of pressure from without and temptation from within.

Character is rooted in value, therefore character education is nothing but value education. As stated by Kesuma, et al (in Maunah, 2015) that character comes from values about something. A character will cling to the value of one's behavior. Therefore, in the perspective of character education, there is no child behavior that is free of values. Various values that form character are developed in individuals/students through character education. Character education is often also called moral education or moral education. William & Schnaps (in Wangid, 2010) defined character education as: "Any deliberate approach by which school personnel, often in conjunction with parents and community members, help children and youth become caring, principled and responsible." The meaning is more or less that character education is a variety of efforts undertaken by school personnel, even those carried out together with parents and community members, to help children and adolescents to become caring, opinionated, and responsible. The process of character education is based on psychological totality which includes all the potentials of individual human beings (cognitive, affective, and psychomotor) and the function of sociocultural totality in the context of interaction within families, educational units, and society (Ministry of National Education, 2011; 9).

4. Guidance and Counseling Services in Character Building

A person's character grows and develops in an environmental context, in the sense that the character is influenced by the environment in which the individual lives. As stated by Ghufon (2012) that the character is contextual and cultural. In the context of individual development, the environment can be classified into the natural / non-social environment (weather, climate, regional geographical conditions), and social environment (family, school, and community). Thus the school environment is one of the factors that can influence the development of student character, including guidance and counseling services.

Character building for millennial generation is intended to shape the millennial generation of Indonesia into a generation that has character, that is, character formed from values derived from Pancasila, religion, culture, and national education goals, which include the values of (1) religious, (2) honest, (3) tolerance, (4) discipline, (5) hard work, (6) creative, (7) independent, (8) democratic, (9) curiosity, (10) national spirit, (11) loving the motherland, (12) appreciating achievement,

(13) being friendly/communicative, (14) loving peace, (15) fond of reading, (16) caring for the environment, (17) caring socially, and (18) responsibility (Center for Curriculum, Development and Education for Culture and Nation Character: School Guidelines, 2009; 9-10).

Guidance and counseling services have an important role in the framework of character building for millennial generation. That role can be explained as follows:

a. Prevent millennial generation from the negative influence of the use of communication and information technology.

The ability of millennial generation in the use of information communication technology makes them inseparable from the use of gadgets and social media. Reality shows that the use of gadgets and social media has a lot of negative influences on the lives of millennials, such as online prostitution, widespread sexual perversion (LGBT), drug use, and others. This condition becomes a challenge and even becomes a big obstacle for character building for millennial generation. Guidance and counseling services must take the leading role in helping millennials to avoid falling into the negative side of using these gadgets and social media. Personal counseling and counseling services are provided to develop the mental strength of students to deal with various negative influences from the internet and social media, high self-motivation to be useful people for society, nation and country, and confident in their abilities.

b. Develop a work ethic

The characteristics of self-confidence, high self-esteem, and great ambition for the success of the millennial generation can be used as a strength to develop a high work ethic in themselves. Personal guidance and counseling and career guidance and counseling are provided to develop a high work ethic in each student. Associated with character, the work ethic is one of the indicators of character.

c. Prevent consumptive and hedonistic lifestyles

The ease in obtaining various products available in the environment with a very persuasive advertising style makes millennial generation easily endured by a consumptive and hedonic lifestyle. Consumptive and hedonic lifestyles are lifestyles that tend to favor using various products offered through social media that lead them to a hedonist lifestyle (a lifestyle that always wants to be happy). Personal guidance and counseling are given to develop productive lifestyles in students, so they avoid consumptive and hedonic lifestyles.

d. Developing an entrepreneurial spirit and an independent soul

The living conditions of the Indonesian people, including the millennial generation who currently tend to be in the position as consumers, can be a great opportunity for millennials to become entrepreneurs. Guidance and counseling services play a role in developing the entrepreneurial spirit and independent spirit of the millennial generation. Career day is one of the methods in career guidance and counseling that students can use to

showcase their work or obtain special skills training that they are interested in from various sources.

e. Develop creativity.

Creativity becomes very important for millennials if they do not want to be run over by competition in various fields of life that is getting tougher. Through personal guidance and counseling, students are provided services to develop their creativity through a variety of service methods, such as fantasy methods and training methods used to train students to develop their imagination and creativity.

If this role can be carried out by guidance and counseling teachers, it means that guidance and counseling services have also played a role in character building for millennial generations. Teacher competence of guidance and counseling/counselor also determines success in carrying out this activity.

In connection with this role, the guidance and counseling teacher/counselor should be a person who:

a. Understanding millennial generation characters

Millennial generation has different characteristics from the previous generation. Facing millennial generation has the consequence in which guidance and counseling teachers must have an understanding of the characteristics of millennial generation. This understanding is very much needed in order to provide guidance and counseling services for millennial generation. Wibowo (2019, 203) suggested that one of the counselors' competencies in carrying out their professional duties was to understand clients in-depth.

b. Creative

Teacher guidance and counseling must be a creative person in connection with the task of developing creativity in the millennial generation. The guidance and counseling teacher/counselor must be creative in thinking about methods, techniques, media, and service materials that provide opportunities for the development of student creativity.

c. Mastering the development of information technology

Mastery of the development of information technology is absolutely owned by the guidance and counseling/counselor teacher in dealing with millennials who have high ability in using information and communication technology. This mastery of information technology makes it easy for guidance and counseling teachers to obtain the latest information about the millennial generation itself, information about various events that can affect the lives of millennial generations, including the use of information technology as a medium for guidance and counseling services.

d. Have an entrepreneurial spirit

As with the ownership of creativity, guidance, and counseling teachers / counselors also need to have an entrepreneurial spirit in order to guide students to have an entrepreneurial and independent spirit. Even if the teacher guidance and counseling/counselor are an example in entrepreneurship, it will be better.

e. Be a model/example in character behavior

The important thing in character building is the experience and exemplary factor. Character is not taught but is developed through direct experience in the form of students doing various character-oriented activities, namely activities in which there are character values that are felt and experienced directly by each student. In addition, teachers, parents, and community members become a source of ethical values that serve as models and examples for students. Without all of that, the character-building effort will not be optimal, even it can be said will not succeed. The guidance and counseling teacher/counselor must be a person of good character who becomes a model for their students.

III. CONCLUSION

The millennial generation of Indonesia that has special characteristics need to be developed into a person who has a character in accordance with the values contained in Pancasila as the philosophy of the Indonesian people. Guidance and counseling have an important role in character building for millennial generation. Therefore, it is very important for guidance and counseling teachers to provide guidance and counseling services for millennial generation character building.
