INTRODUCTION

The existence of the village is legally recognized in Law 32 of 2014 about local government and government regulation number 72 of 2005 concerning villages. Based on this provision the village is given the understanding as a unitary legal community that has territorial boundaries that are authorized to regulate and take care of the interests of the local community based on origin, local customs that are recognized and respected in the system of the Unitary States of the Republic of Indonesia. The above village understanding places the village as an organization that politically has the authority to take care of and regulate its citizens or communities. Under the provisions of government regulation number 72 of 2005 concerning villages granted authority which includes: a) existing government affairs based on village rights, b) governmental affairs which are the authority of the district / city which are handed over to the village, c) assistance assignments from the Provincial government and the municipal government and d) other governmental affairs which by legislation are left to the village.

Observing what is mandated through this village fund, program development and p community welfare environment which is the main goal, and the role of the village government in this case is the key to how to allocate the funds as appropriate, namely for development and p community welfare environment. Improvement of community welfare basically is helpful authentic and integral human development of a society that is weak, poor, marginal and small people and empower groups - group the community socially al economical so they can more independent and can meet their basic needs, however be able to participate in community development. Village Government in a effort to

improve the welfare of the community must return to the main task and function as village leader, i.e. including: 1) fostering the lives of village communities, 2) fostering the village economy, 3) subordinate village development in a participatory manner, and 4) exercise other authority in accordance with statutory regulations. Pilobuhuta Village Batudaa District is one of the villages that has received village funding since 2018, with a range of funds of Rp. 1,000,000,000. The special village funds received by the Pilobuhuta Village of Batudaa District in 2020 amounted to Rp 1,347,800,000. The results of the initial observation indicate that village funds received were used to improve community welfare and funds for village development. From the welfare aspect the community shows that the level of community welfare has decreased compared to the previous year. Data for 2020 show that the level of community welfare in Pilobuhuta village has decreased from the previous 2018 average community income of Rp 1,000,000 bandages but since 2020 the average community income has decreased to an average of Rp 850,000 per month. This decline in community income was partly due to the covid pandemic 19. The poverty rate in Pilobuhuta Village also increased to 20% of the total population in Pilobuhuta Village, Batudaa District. Based on the results of this observation it shows that the level of community welfare in the Pilobuhuta Village of Batudaa District needs to be raised.

Based on data obtained through the results of observations and interviews above, the author can conclude that the welfare of the Pilohubuta Village of Batudaa District District Distr of Gorontalo has improved with the provision of infrastructure built by using village funds. This shows that village funds that have been disbursed by the government have been partly used to provide infrastructure so that it impacts the improvement of the welfare of the village

community. SWOT Analysis Village Fund Management Strategy To Improve Community Welfare Pilohubuta Village Batudaa District District Gorontalo. Internal Strategy Factor Internal factors in the SWOT analysis consist of Strength (strength) and weakness (Weakness). the results of the calculation of the coordinate point are located at (0.45): (0.24) which signifies Quadrant I (Positive, Positive). This position signifies the management of village funds carried out in the Pilohubuta Village of the Batudaa District District of Gorontalo has been able to improve the welfare of the community and make a significant contribution to the improvement of infrastructure facilities supporting the improvement of the standard of living and community welfare. Management of village funds is part of efforts to develop village financial capacity to be able to finance village needs optimally. The principle of managing the Village Fund an inseparable part of the financial management of the Village in the APBD, all activities financed by the Village Fund are planned, carried out and evaluated openly by involving all layers of village society, all activities must be responsible in an administrative, technically, and manner law. Village Funds are used in a directed, economical, efficient, effective, just and controlled manner. Related research results village fund management strategy to improve the welfare of the village community Pilohubuta Batudaa District District of Gorontalo as follows: Management mechanism Village funds in Pilohubuta Village Batudaa District District Gorontalo District. The results showed that the mechanism for managing village funds in the Pilohubuta Village of the Batudaa District District of Gorontalo was implemented with pay attention to the orderly principles of the budget, orderly activities, and orderly administration. In this context the mechanism for managing village funds is carried out in accordance with the path established by the local government. As for village financial management mechanism in the village of Pilohubuta Batudaa District District Gorontalo Regency. Village money must enter the RKD (Village Cash Account) first before spending, which includes: PAD of all village assets and dana transfer, as well as budget from the 3rd party. All of these funds go into the regional cash account. This is done so that the village can inventory all potential funds held so that it can be optimally utilized for the development of village hostilities. The results showed that village fund managers started from village heads as Holder of Village Financial Management Power (PKPKD), Village Secretary as PKKD Coordinator (Works of Village Financial Management) and as Verifier, Kaur and Kasi as PKA (Effective Budget Activity) as in their respective fields, Financial Kaur as Village Treasurer Head of Territory and LKD (Village Community Institution) as TPK (Acting Team). BPD (Village Consultative Agency) as the Supervisory and Evaluator Team, as well as mas as a society with a regional or community approach as part of the Trustees and Evaluators. All of them have done their job well even though there are still a number of managers who need to be increased in capacity or quality. This is done so that village fund management can achieve optimal and well-managed results. Infrastructure development Pilohubuta Village after village funds. Research results show that infrastructure developments in the Pilohubuta Village of Batudaa District have experienced quite rapid development in the presence of village funds. In this context village funds are used in addition to improving community welfare and are also used in the procurement of facilities and infrastructure in the village. Other infrastructure developments can be seen in road access in the Pilohubuta village of Batudaa District. In this context the road conditions from agricultural land to the Trans Batudaa road are in damaged condition. At the initiative of the Village Representative Agency and the village government built a farm road as access to open the road from the agricultural area towards the trans Batudaa road. The construction of this farm road was carried out in 2018 and used village funds of 83 million. The construction of this farm has contributed significantly to the increased marketing of farmers' agricultural products. In this context facilitate farmers in the development and improvement of agricultural products especially the mobilization of transportation of agricultural products that were previously far away and will be very easy if the road is ready later. The results of this study indicate that funds Pilohubuta Village Batudaa District District Gorontalo District used for improvement community welfare. Through providing infrastructure built by using the village funds. has an impact on improving the welfare of village communities.
