Abstract: As stipulated by the 1945 Constitution, article 27 paragraph (2) "Every citizen has the right to decent work and livelihood for humanity" so that one of the important role of government is how to encourage the provision of goods and services needed and desired community, as well as opening jobs one of the success achievement of a government, can be seen from how many jobs can be created for all citizens, and how small the level of unemployment occurs. Population of Gorontalo City who annually employment opportunities limiting that result in unemployment. The purpose of this study is to determine the cause of unemployment in the city of Gorontalo and to determine government policy in dealing with unemployment conducted by the Department of Social Welfare and Labor Gorontalo City. The method used is qualitative research methods with the interview data collection techniques, documentation and observation. Primary data source in this study namely leader and social service officials and labor, Community leaders and unemployment as research informants. Secondary data were taken from various documents related to the subject and object of research. Techniques of data analysis using the domain analysis, taxonomy, componential, and analysis of cultural themes. Mechanical testing of the validity of data used in the extension of participation, persistence observation, and triangulation. The results showed that (1) Unemployment in the city of Gorontalo is caused by several things: lack of jobs in the government sector, education levels, lack of skills and a desire to become civil servants. (2) Government policy in overcoming unemployment is carried on by the Department of Social Welfare and Labor Gorontalo City, performed in three grand strategies through the expansion of employment programs, namely: Intensive Program, Program of Appropriate Technology, and Certification and Job Placement program. From the results of this study it can be concluded that the three grand strategies can reduce unemployment. Its implementation is supported by a clear bureaucratic structures, cooperative relationship with the institution / other institutions, infrastructure, facilities Training Center as well the access to venture capital (Credit people's Business). It is recommended that government policy in dealing with unemployment in the city of Gorontalo should be continued to create and expand employment opportunities for the public welfare.

Key words: Government Policy and Unemployment

Abstrak: Sesuai amanat UUD 1945, pasal 27 ayat (2) "Setiap warga negara memiliki hak untuk pekerjaan dan penghidupan yang layak bagi kemanusiaan" sehingga salah satu peran penting dari pemerintah adalah bagaimana mendorong penyediaan barang dan jasa yang dibutuhkan dan masyarakat, serta membuka lapangan kerja salah satu prestasi keberhasilan pemerintah yang diinginkan, dapat dilihat dari berapa banyak pekerjaan dapat dibuat untuk semua warga negara, dan seberapa kecil tingkat pengangguran terjadi. Penduduk Kota Gorontalo yang setiap tahunnya kesempatan kerja yang membatasi resul
